👤 Profile

Innovative and results-driven professional with a proven ability to design, develop, and deliver end-to-end solutions that integrate robust web applications with advanced data science techniques. Excels at bridging the gap between software development and machine learning, leveraging a strong understanding of both domains to create intuitive user experiences and scalable backend systems. Adept at collaborating across cross-functional teams to meet project objectives and deliver impactful business outcomes.

📜 Certificates

E&ICT Academy IIT Guwahati

Advanced Certification Program in Data Science and Generative AI

📁 Professional Experience

Freelancer

Full Stack Developer

07/2024 - present | Jaipur, India

- Partnered with clients across diverse industries to deliver tailored web applications and data-driven solutions.
- Built and deployed responsive and scalable front-end applications using React, Redux, and modern UI libraries like Material UI and Chakra UI.
- Managed project timelines and budgets independently, ensuring on-time delivery and exceeding client expectations.

Abha Power Project (GOEM of Escorts Kubota)

Data Analyst

11/2022 - 07/2024 | Jaipur, India

- Analyze historical data on Genset performance including run time, fuel consumption and maintenance records.
- Evaluate the efficiency of genset operations.
- Analyze warranty claims data to identify common issues or failure patterns across Genset models or customer segments.
- Utilize historical sales data to forecast future demand for Gensets and related products.
